PROJECTS

Bookwarm: [Github](#) | [Live](#) *React, Firebase, Sass*

- Developed Google Firebase structure for book journal app and tested how Google Authentication works.
- Implemented Firestore users collection and booksCollection to store book data for each user.
- Added Modal for Add/Edit components, and implemented rating and loading components.

Happy-Hour-Trivia: [Github](#) | [Live](#) *React, TriviaAPI*

- Implemented [Trivia API](#) to create a Trivia app. Used the app to throw a online happy hour.

MyJob-listing: [Github](#) | [Live](#) *React, sass*

- Manipulated job data using Frontendmentor's design and JSON data.
- Implemented Context hook for dynamic skill filtering.
- Developed responsiveness for desktop and mobile views.

Catcafe-RN: [Github](#) *React Native*

- Converted the project to React Native.
- Implemented Yup for formik validation.

Catcafe-Next: [Github](#) | [Live](#) *Next.js, Formik*

- Converted a React app to Next.js. Used Reactstrap to resolve NavLink issues.
- Used ES6 function and react hooks. Used Formik for form validation.

EXPERIENCE

mymizu | Front-End Developer, Feb 2025- Present

- Developing filter & sort functions to map view menu using React Native.
- Developing search feature so that user can find refill spots based on their input.

Jisho Project | Front-End Developer, Oct 2023- Aug, 2024

- Developing a Japanese dictionary app using React Native for English speakers. Converted XML to JSON, then created a SQL database for optimizing the search function.
- Developing a frontend components for search bar, search results and word page.

Tech Fleet | Frontend Developer, Apr 2023 - May 2024

- [Mentorship web app](#): Developed React components for frontend design, and utilized Firebase to store user information.
- Healthcare PWA: Developed frontend design in React, and integrated Google Maps API.
- 529 College Saving App: Created design systems in Framer converted from Figma.

Amazon Web Services | Route 53 Customer Advocate, Nov 2014-Dec 2021

- Handled account and billing issues for Japanese and English-speaking customers.
- Addressed abuse and security cases, communicating with the abuse/ EC2 security team.
- Provided Route 53 solutions to customers while staying updated with the latest internal procedures.

Bungie Studio | Localization Tester, Mar 2014 – Jun 2014

- Conducted various test passes on PlayStation 3 and 4 for the game *Destiny* in Japanese, as well as on the game's web portal.
- Identified typographical, grammatical, and contextual errors in the localized environment.
- Reviewed in-game audio lines to identify issues across different missions. Corrected and reported the bugs to enhance usability.

SONY Electronics | VAIO Software QA Tester, Aug 2011 – Dec 2012

- Reproduced software issues on Sony hardware within a Windows 8 environment.
- Escalated issues for high-demand products to Microsoft TAM for resolution.
- Acted as a liaison between Sony and Microsoft, attending bi-weekly Sony-Microsoft meetings.

Pacific Software Publishing | Customer Support Supervisor, Jan 2005- Jul 2011

- Provided technical support to both English and Japanese speaking customers.
- Managed server administration for email and web hosting service.
- Led the support team to maintain high standards in customer satisfaction. Collaborated with upper management and the Research and Development team.
